2-3-2. When both master and backup master go down	I-14
2-4.Master failure during X/Z collection/consolidation or terminal data transfer	I-14
2-5.Satellite terminal down	I-14
2-6.LAN printer down.....	I-15

To prevent malfunctions caused by the weak batteries, charge the memory protection batteries for over 8-hours.

- Before installation, initialize the terminal and leave it power on over 8-hours.
- After a longtime vacation(over 30 days), initialize the terminal and restore the program data if the terminal is in malfunction, and leave it power on over 8-hours.
- QT-6600 consumes batteries for saving data during 6 minutes after turning off the terminal.
- Do NOT power off the terminal over 3 times while a short term. (Except INIT or FC operation) Otherwise, it makes weak batteries.
