DEALER'S MANUAL

Version 1.0 March 2010

Di

CI

Canada

Introduction & Contents

This manual is intended to be used as a reference to the SE-S6000 and SE-C6000 system. It provides details for whole understanding of the system configuration, programming options and operations and explains some of applications how are they used in real markets.

This manual consists of the following chapters:

1. Hardware configuration (for installation)
This chapter describes the hardware of these models and their network systems.
2. IPL (initial program loading)
This chapter describes how to download the application program to the terminal.
3. Initialization
This chapter describes how to set up the peripheral devices and the terminals.
4. Programming
This chapter explains actual programming procedure and functions.
5. Manager mode
6. X/Z report
7. Application system
8. Tips
9. Appendix:

Printing history
