Preface

The electronic cash register described in this manual is designed to help your business function smoothly by providing efficient register operations and accurate management reports. Start-up is quick and easy, yet there are many options that can be added and revised so that you can customize your operations for optimum productivity. Here are just a few of the cash register's many valuable features:

- 8 departments and 12 Price Look-Up (PLU) settings;
- possibility of defining a password that prevents unauthorized access to the machine's programming mode (PRG) and Z management report mode;
- printer with journal record and receipt printing capabilities;
- possibility of programming the departments with a tax status and single/multiple item sale;
- Euro exchange rate programming;
- possibility of programming the machine to work with one of two base currencies, Local or Euro, so that cash register computes in the currency set and automatically converts the related transaction totals into the other currency;
- a Liquid Crystal Display (LCD) consisting of a 9-character transaction and message line;
- automatic tax computations for 4 different VAT rates;
- department-linked entry options that streamline and speed-up operation;
- periodic management and financial reports which provide up-to-date sales analysis;
- possibility of powering the cash register using four 1.5 V size C batteries or via line voltage using the external power supply provided;
- battery back-up protection for the records and programming data.
