LAITE ON LITETTÄVÄ SUKO-RASIAAN.
Lederen med grøn/gul isolation må kun tilsluttes en klemme mærkt eller

To disconnect the cash register from the line voltage, unplug its power cord from the power outlet. The power outlet must be located on a wall, near the cash register and easily accessible.

Preface

The electronic cash register described in this manual is designed to help your business function smoothly by providing efficient register operations and accurate management reports. Startup is quick and easy, yet there are many options that can be added and revised so that you can customize your operations for optimum productivity. Here are just a few of the cash register's many valuable features:

- 40 departments and 999 Price Look-Up (PLU) settings;
- 26 clerk numbers to monitor the sales of individual employees;
- possibility of assigning a three-digit security code to prevent unauthorized access to individual clerk transactions (during register mode only);
- possibility of defining manager passwords to prevent unauthorized access to the machine's programming mode (PRG), Z mode and X mode;
- possibility of assigning a name to each clerk for rapid identification;
- 2-station dot-matrix printer that prints information on 2 separate rolls of paper, providing customer receipts and a transaction journal;
- customer sales receipt header personalization;
- personalization of Local currency, Euro currency, currency convert and credit captions on the sales receipts and reports;
- possibility of reserving two departments for registering credit tenders separately;
- Euro exchange rate programming;
- possibility of programming the machine to work with one of two base currencies, Local or Euro, so that cash register computes in the currency set and automatically converts the related transaction totals into the other currency;
- rear customer numeric display for transaction viewing;
- front operator alphanumeric display consisting of a 10-character message line on top and a 10-character transaction line on the bottom;
- automatic tax computations for 4 different VAT rates;
- department-linked entry options that streamline and speed-up operation;
- periodic management and financial reports that provide up-to-date sales analysis;
- automatic time display after a period of system inactivity;
- automatic time and date printing on receipt and journal records;
- programmable customer receipt and journal record printing in any one of four languages (English, French, German and Spanish);
- possibility of validating documents at the end of a transaction;
- possibility of issuing copies of a transaction receipt without increasing the receipt consecutive number and without recording the copies on the journal record and reports.
