LAITE ON LITETTÄVÄ SUKO-RASIAAN.
Lederen med grøn/gul isolation må kun tilsluttes en klemme mærkt eller

To disconnect the cash register from the line voltage, unplug its power cord from the power outlet. The power outlet must be located on a wall, near the cash register and easily accessible.

Preface

The electronic cash register described in this manual is designed to help your business function smoothly by providing efficient register operations and accurate management reports. Start-up is quick and easy, yet there are many options that can be added and revised so that you can customize your operations for optimum productivity. Here are just a few of the cash register's many valuable features:

- 8 departments;
- 99 Price Look-Up (PLU) settings;
- 8 clerk numbers to monitor the sales of individual employees;
- possibility of activating a Clerk Security System, that consists of the definition of a Clerk identification number only or of a Clerk identification number with associated three-digit security code, to prevent unauthorized access to individual clerk transactions (during register mode only);
- possibility of defining a password that prevents unauthorized access to the machine's Z management report mode;
- printer with journal record and receipt printing capabilities;
- possibility of programming the departments with a single/multiple item sale status, tax status and a preset price;
- possibility of programming a foreign currency exchange rate;
- possibility of programming the machine to work with one of two base currencies, Local or Foreign, so that cash register computes in the currency set and automatically converts the related transaction totals into the other currency;
- 9-character front operator Liquid Crystal Display (LCD);
- Cash, check and charge tender media keys
- automatic tax computations for 4 different VAT rates;
- department-linked entry options that streamline and speed-up operation;
- periodic management and financial reports which provide up-to-date sales analysis;
- battery back-up protection for the records and programming data.
