

on having chosen an Olympia Office cash register.

Due to the simple layout of its keypad and the large number of programmable functions, this cash register is especially user-friendly.

The cash register enables you to categorise your items according to different departments, store the names of certain items, add a logo to the receipt and keep a journal. Different types of reports can be generated in order to analyse the sales numbers.

The cash register can be programmed by means of communication software. In this case, additional functions such as monitoring the stock and generating graphical analyses are available.

This user manual describes the cash register's functions, components and operation steps. Read this manual carefully so you can take advantage of your new cash register in the best way possible.

Olympia Office Vertriebsgesellschaft mbH

Important

The action to be taken in the case of damage during transport is explained in the chapter "Reporting loss or damage" at the end of this manual.

This user manual is purely informative. The contents are not part of any offer for sale or contract.
