

SHARP SERVICE MANUAL

CODE : 00 ZDP 730 SM /- E

SERIAL DOT MATRIX PRINTER

MODEL DP-730

CONTENTS

Section 1 Using and Maintaining the Printer	1
Section 2 Specifications and Principle Operation	2
Section 3 Disassembly and Re-assembly	11
Section 4 Troubleshooting	28
Section 5 Timing Chart	35

Parts Lists : (K1-0B6778RCZZ)

This document has been published to be used for after sales service only.

SHARP CORPORATION

Foreword

This manual describes the principle of operation and the maintenance procedure for DP730 Series Citizen Dot Matrix Printers. It is intended for maintenance technicians in the field.

Features

The DP730 series printers are station printers that are provided with a 45 mm × 2 printing function. These printers have been developed for POS/ECR use. They have the following features.

- * A high performance 9-pin head is provided, realizing a high printing speed of 3.0 lines/second and high print quality.
- * The printer is compact, light and low priced. This has been realized as a result of rational mechanical design.
- * A clamshell mechanism (opening and closing mechanism of the paper guide) is employed, resulting in improved paper loading performance and maintainability.
- * A pull type paper feed mechanism is employed for minimizing paper jams.
- * A wide range of option mechanisms is available.
(Stamp, auto cutter, take-up unit, paper feed unit, validation sensor, receipt/journal near end sensor.)

Table of Contents

Section 1	Using and Maintaining the Printer	1
Section 2	Specifications and Principle of Operation	2
2-1	General Specifications	2
2-2	Outline of Mechanisms	4
2-3	Mechanisms and Principle of Operation	4
2-3-1	Power transmission mechanism	4
2-3-2	Sensor mechanism	4
2-3-3	Print head mechanism	5
2-3-4	Paper feed mechanism	6
2-3-5	Ribbon cassette mechanism	6
2-3-6	Paper take-up mechanism	7
2-3-7	Stamp mechanism	8
2-3-8	Auto cutter mechanism (option)	8
2-4	External Connectors	9
2-4-1	Terminal layout	9
2-4-2	Terminal function	9
2-4-3	Terminal circuit diagram	10
Section 3	Disassembly and Re-assembly	11
3-1	List of Tools and Measuring Instruments	11
3-2	Disassembly Procedure	11
3-3	Assembly Procedure	11
3-4	Adjustment Procedure	23
3-4-1	Printing speed adjustment	23
3-4-2	Platen/head gap adjustment	24
3-4-3	Bi-directional printing error adjustment	24
3-4-4	RP/HP waveform confirmation	25
3-4-5	Validation sensor adjustment	25
3-4-6	Paper near end sensor adjustment	25
3-5	Replacing the Head Assembly	26
3-5-1	Removal procedure	26
3-5-2	Assembly procedure	27
Section 4	Troubleshooting	29
4-1	Repair Procedure	29
4-2	Repair Guide	29
Section 5	Timing Chart	35
	Parts Lists
