GENERAL

1. For the ER-3600/3630 cash register, these options that are shown in Table 1 are available.
   The table reveals their model names and whether or not their installation needs any interface PWB and SRV programming.
2. Figure 1 depicts how each interface PWB should be placed.
   As seen from this figure, either of the ER-36MB and the ER-36KP1 interface memory PWB may be installed first; however, the ER-37DI interface PWB must be installed in the highest location if necessary.
