MANUAL DE INSTRUCCIONES

SHARP®

WARNING

FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when this equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

CAUTION

The AC power socket-outlet should be installed near the equipment and should be easily accessible.

FOR YOUR RECORDS

Please record below the model number and serial number for easy reference in case of loss or theft. These numbers are located on the right side of the unit. Space is provided for further pertinent data.

Serial Number _____

Date of Purchase _____

Place of Purchase _____

INTRODUCTION

Thank you very much for your purchase of the SHARP Electronic Cash Register, Model XE-A505. Please read this manual carefully before operating your machine in order to gain full understanding of functions and features.

Please keep this manual for future reference. It will help you if you encounter any operational problems.

CAUTION!

- **Be sure to initialize the cash register before you start operating the cash register.** Otherwise, distorted memory contents and malfunction of the cash register will occur. For this procedure, please refer to page 8.

IMPORTANT

- **On the printer, a paper cutter is mounted. Be careful not to cut yourself on the paper cutter.**
- **Install your register and the barcode scanner in a location that is not subject to direct radiation, unusual temperature changes, high humidity or exposed to water sources.**
Installation in such locations could cause damage to the cabinets and the electronic components.
- **Never operate the register and the barcode scanner with wet hands.**
The water could seep into the interior of the register and the barcode scanner and cause component failure.
- **When cleaning your register or barcode scanner, use a dry, soft cloth. Never use solvents, such as benzene and/or thinner.**
The use of such chemicals will lead to discoloration or deterioration of the cabinets.
- **The register plugs into any standard wall outlet (120V AC \pm 10%).**
Other electrical devices on the same electrical circuit could cause the register to malfunction.
- **If the register or the barcode scanner malfunctions, call 1-800-BE-SHARP for service - do not try to repair the register or the barcode scanner yourself.**
- **For complete electrical disconnection, disconnect the main plug.**

PRECAUTION

This Electronic Cash Register has a built-in memory protection circuit which is operated by rechargeable batteries.

As you know, all batteries will, in time, dissipate their charge even if not used. Therefore to insure an adequate initial charge in the protection circuit, and to prevent any possible loss of memory upon installation, it is recommended that each unit be allowed to recharge for a period of 24 to 48 hours prior to use.

In order to charge the batteries, the machine must be plugged in and the mode switch must be in a position other than "OFF". This recharging precaution can prevent unnecessary initial service calls.
