

# Owners Manual

**TEC ELECTRONIC CASH REGISTER**

**MA-1040-100 SERIES**

***TEC* TOKYO ELECTRIC CO.,LTD.**

The receipt roll can be advanced even when the [RECEIPT ON/OFF] switch is in the OFF position. Receipt feeding during a sale is also allowed.

JF

#### JOURNAL FEED ([JF])

This key is used to advance the journal roll in the same fashion as the [RF] key. This key is useful if the cashier, due perhaps to an interruption whilst ringing up a sale, is unsure which items have already been entered. By using this key, the cashier can see which figures have actually been printed.

The [RF] and [JF] keys can not be operated simultaneously.

7	8	9
4	5	6
1	2	3
0	00	

#### NUMERIC KEYS (|\_|)

These are used to enter numeric values such as amount, quantity, or code number.

Depressing the [00] key once is the same as depressing the [0] key twice consecutively.

The maximum listing capacity is 8 digits for inputting a numeric value only, and 7 digits for registration except that a non-add number (through the [#] or [# / NS] key) may be entered in maximum 8 digits.

.

#### DECIMAL POINT KEY ([.])

This key is used, as part of the numeric keys, to designate the position of the decimal point when entering a percent rate or a quantity with a decimal portion. For example, to enter 0.5%, index 0→[.]→5, or [.]→5.

When entering a price or amount such as \$0.25, just index 2→5. In this case, depression of the [.] key is not necessary and will cause an error.

000

#### TRIPLE-ZERO KEY ([000])

This key may be installed as part of numeric keys. Depressing the [000] key once is the same as depressing the [0] key three times consecutively or the same as depressing [0] and then [00] in series.
