INTRODUCTION

This programming manual is provided for salespersons, field engineers, and other support personnel as supplementary manual for the TEC electronic cash register series MA-1040-200. Reading through the MA-1040-200 Owners Manual is recommended in order to thoroughly understand the description in this manual.

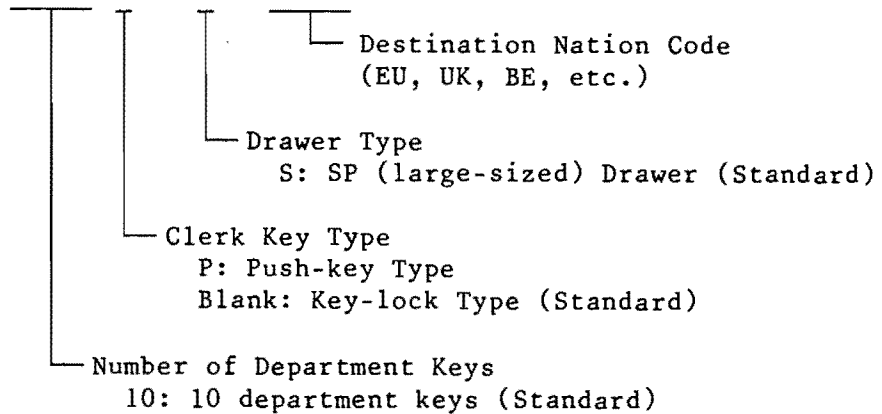

The MA-1040 has been developed to fit the needs of the general purpose retail environment. It is installed with a new dot-matrix printer, which enables horizontal validation printing and larger print width capacity than that of the MA-1050 series, and still provided with almost the same functions and programmabilities as the MA-1050 series. A new front display, which is adjustable in the up-and-down angle, and a new rear display, which can be stretched up and may be used as remote display, are adopted for the MA-1040 series.

SPECIFICATIONS
