## 1. OUTLINE

The MA-1900 is a deluxe ECR (Electronic Cash Register) which has been developed for use at general retail stores and specialty stores as a high-ranking model in the MA-1100 Series.

Adopting a new cabinet with a dot display, this machine, when used as stand-alone, provides value added specifications including ABC analysis and a gross-profit-by-department calculation feature in addition to all the features of the MA-1100 Series ECRs. With an IFU board connected, it can also have a TDLC I/F, scanner I/F, modem I/F, etc. to operate as a system ECR considering expansion from the M/S system or PC system to a scanning system in future.
