## MP55 module

| <b>Contents</b>                                                                                 | <b>Page</b> |
|-------------------------------------------------------------------------------------------------|-------------|
| <b>Safety instructions</b> .....                                                                | <b>4</b>    |
| <b>1 Introduction</b> .....                                                                     | <b>7</b>    |
| 1.1 List of components and accessories supplied .....                                           | 7           |
| 1.2 Introduction .....                                                                          | 7           |
| <b>2 Choose amplifier settings with the aid of DIP switches</b> .....                           | <b>8</b>    |
| <b>3 Fitting/removing the MP55</b> .....                                                        | <b>12</b>   |
| 3.1 Linking several modules .....                                                               | 13          |
| <b>4 Connections</b> .....                                                                      | <b>14</b>   |
| 4.1 Functional overview of the MP55 .....                                                       | 14          |
| 4.2 Supply voltage and remote contact I/Os .....                                                | 15          |
| 4.2.1 External supply voltage for the control I/Os .....                                        | 16          |
| 4.3 Transducers .....                                                                           | 17          |
| 4.4 CAN-interface .....                                                                         | 19          |
| 4.5 Synchronisation .....                                                                       | 20          |
| <b>5 Setting up and operation (MP55)</b> .....                                                  | <b>21</b>   |
| 5.1 Operating principles .....                                                                  | 21          |
| 5.2 Commissioning .....                                                                         | 24          |
| 5.3 Overview of all groups and parameters .....                                                 | 25          |
| 5.3.1 Set up all parameters .....                                                               | 26          |
| <b>6 Declaring the significant parameters</b> .....                                             | <b>30</b>   |
| <b>7 CAN interface description</b> .....                                                        | <b>38</b>   |
| 7.1 Introduction .....                                                                          | 38          |
| 7.2 Cyclical data transmission .....                                                            | 38          |
| 7.3 Parameter assignment .....                                                                  | 39          |
| 7.4 Object directory: communications profile section<br>as defined in CANopen (CiA-DS301) ..... | 41          |
| 7.5 Object directory: manufacturer-specific objects .....                                       | 44          |
| 7.6 Manufacturer-specific objects in FLOAT data format .....                                    | 53          |
| 7.7 Examples .....                                                                              | 55          |
| <b>8 Error messages/operating status (LED)</b> .....                                            | <b>57</b>   |
| <b>9 Specifications</b> .....                                                                   | <b>60</b>   |
| <b>10 Keyword index</b> .....                                                                   | <b>63</b>   |
